

QUIDELORTHO CORPORATION
CONFLICT MINERALS POLICY STATEMENT

QuidelOrtho Corporation's (the "**Company**") mission is to develop and manufacture innovative technologies that raise the performance of diagnostic testing and create better patient outcomes across the entire healthcare continuum. Protecting the environment and advancing sustainability go hand-in-hand with our purpose of improving and saving lives through diagnostics. We are committed to operating in a legal and ethical manner that supports the environmental health of the communities in which we operate and the sustainability of the planet. In our operations, we focus our environmental efforts on reducing waste and energy consumption, reducing or eliminating the use of hazardous substances, generating clean energy at our global facilities, and incorporating environmentally friendly practices into our product manufacturing and packaging. Further, we work to ensure that every QuidelOrtho employee understands that they have a vested interest in furthering these principles as they relate to our products and operations.

On August 22, 2012, the U.S. Securities and Exchange Commission ("SEC") adopted rules implementing disclosure requirements related to "conflict minerals," as directed by Section 1502 of the Dodd-Frank Wall Street Reform and Consumer Protection Act of 2010 (the "Dodd-Frank Act"). The term "Conflict Minerals" in this context refers to specific minerals originating from mines controlled by armed groups in the Democratic Republic of the Congo or adjoining countries. These Conflict Minerals (also known as 3TGs) are:

- tin (cassiterite);
- tungsten (wolframite);
- tantalum (columbite-tantalite or coltan); and
- gold.

The Company complies with the Organisation for Economic Co-operation and Development ("OECD") Due Diligence Guidance for Responsible Supply Chains of Minerals from Conflict-Affected and High-Risk Areas, as well as the applicable requirements of Section 1502 of the Dodd-Frank Act. We are committed to sourcing components and materials from companies that share our values regarding respect for human rights, integrity, and environmental responsibility. To meet this objective, the Company will:

- Endeavor to comply with the applicable SEC disclosure requirements related to Conflict Minerals.
- Train our procurement employees on our obligations under the Conflict Minerals rules.
- Require our suppliers to conduct due diligence on the origin and chain of custody of minerals in accordance with OECD guidance to help ensure that smelters and refiners in their supply chain sourcing minerals from conflict-affected and high-risk areas are either in compliance with the Responsible Minerals Assurance Process assessment protocols or are actively working towards becoming in compliance.
- At least annually request our direct material suppliers to submit a report consistent with the Responsible Minerals Initiative Conflict Minerals Reporting Template and review their submissions against conformance to the Responsible Minerals Initiative; and
- If one of our suppliers has challenges in complying with our expectations, the Company will work with that supplier to address the concerns.

Upon request, the Company will provide our customers with Conflict Mineral Reporting (CMRT) data we collected from our supply base, enabling customers to meet their own respective SEC reporting requirements.

If you have specific questions or would like additional information, please email conflictminerals@quidel.com.
