# ORTHO Sera: Comprehensive support for patients with unexpected antibodies.

Extended antigen typing has met its match in the ORTHO Sera suite of reagents.

Covering 99% of the most commonly tested antigens, ORTHO Sera on the ORTHO VISION® Platform distills even complex testing down to just 3 easy steps.

The benefits of using ORTHO Sera:

- **Utilizes additive approach**, which means you always have the right reagents on hand — and testing flexibility when extended antigen testing is required
- **Reduces manual interaction** to minimize the potential for error
- **Delivers results** in a maximum of 20 minutes\*
- **Provides standardized testing method** to help bring the skills of your staff to a more consistent level
