

Are you running your lab, or is your lab **running you?**

Introducing an open automation platform that puts you in control.

Run your lab – your way.

No one knows your lab better than you do. That's why Ortho Clinical Diagnostics created the next generation of lab automation – and put you in control.

Recognizing the limitations of existing rigid configurations, we brought together industry leaders to redesign a platform that gives you the freedom and flexibility to make your lab work exactly the way you want it to – now and in the future.

Reach your financial and operational goals.

It's all about continuous quality improvement – of your staff, your processes and your results – while reducing costs, equipping your lab for future growth and meeting patients' needs.

- Enables stepwise investment, so you can expand and adapt as test volume grows, lab demands change, or new technologies become available
- Best-in-class technology meets the demands of today and empowers you to grow progressively in the future
- Lean principles services improve implementation processes and boost efficiencies

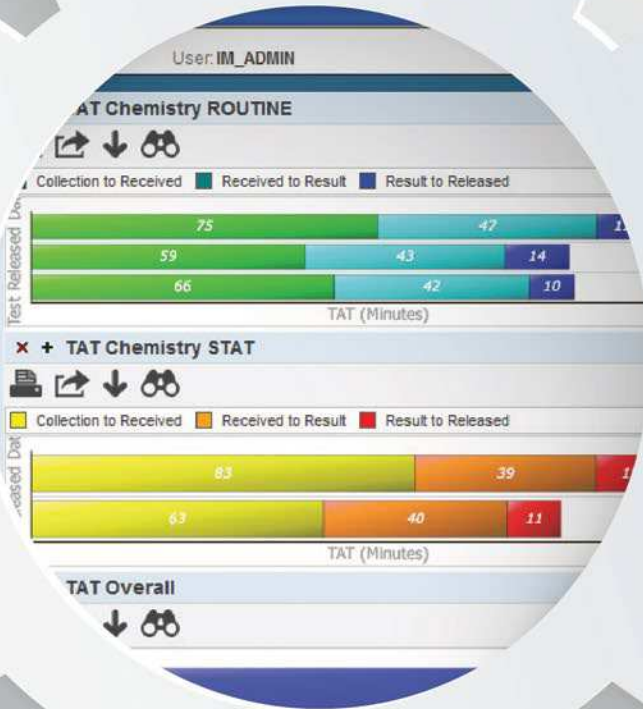

Take back
your lab
with our
expandable
automation
solutions.

Open: Connect the systems
you need to create an automated,
streamlined workflow

Scalable: Grow at your own pace without having to completely redesign your lab

Flexible: Configure hardware and software to align with how your lab actually works

“We have relied on Ortho Clinical Diagnostics automation solutions through a **decade of successful upgrades, reconfiguration and relocation.** Their durability and adaptability have proved to be crucial.”
Lab Manager, Belgium.

The implementation of IM Solutions for VITROS helped Marion General **reduce total turnaround time by 14% and achieve over 90% autoverification of results.**¹

Righospitalet hospital in Denmark implemented the enGen Laboratory Automation System in 2009 and have **tripled their lab activity without adding additional staff.**²

Control Operations

Thermo Scientific™ TCAutomation™ – allows you to define and grow your lab over time for optimal efficiency:

- Connect only the pre- and post-analytical modules and systems you need – when you need them
- Configure the track to fit your space and workflow
- Add systems from other disciplines to create a fully automated lab, including menu expansion
- Capitalize on your Automation investment using enGen with its proven reliability and operational excellence
- Our new Cold Storage unit integrates seamlessly

Control Performance

IMSolutions™ for VITROS® (IMSV), the proven technologies of Ortho Clinical Diagnostics in partnership with the industry leader in middleware – Data Innovations – delivers:

- Unique auto-verification with VITROS® Systems' proven technologies
- Fast results, to serve clinicians better
- Instant access to timely, actionable performance metrics
- Rapid and minimally disruptive implementation with pre-written auto verification rules

Control Quality & Increase Uptime

Our proprietary Intellicheck® Technology gives you:

- Real-time process control that protects the integrity of your results
- Instant access to real-time transactional data through a customizable dashboard

The Predictive Technologies Center features our proprietary e-Connectivity® Interactive System Management that:

- Continuously tracks the condition of instrument performance
- Helps identify specific service needs up to 30 days in advance to increase uptime
