

VITROS® XT 3400 Chemistry System
Upgrade to Digital Technology

VITROS^{System} XT 3400
Chemistry

- VITROS® XT System native Digital Reflectometer **improves performance and precision**
- **Doubling of testing output** from one MicroSlide is the XT MicroSlide difference
- **Lower sample volume*** per XT MicroSlide test with only 74.8ul required for a Complete Metabolic Panel (**CMP**).

BMP/CMP Turn Around Time VS. Competitors Instruments

VITROS® XT 3400 Enhancements

EFFICIENCY

Improved User Experience

3X the throughput with a compact design compared** to current Chemistry Systems

Increased efficiency and flexibility when paired with VITROS® Automation Solutions

RELIABILITY

Ready to go when you need it

Maximize uptime through eConnectivity, Ortho's innovative monitoring software system

Digital imaging system reduces instrument hands-on⁴ time, frees up staff, and reduces errors with automatic monitoring

CONFIDENCE

Accurate & Efficient Result Reporting

VITROS® INTELLICHECK®, which increases result certainty and minimizes repeat testing and reduces manual tasks for lab staff

VITROS® MicroSensor detects and reduces the impact of compromised sample quality on results

Prevalence of common sample interferences

Ortho offers a 98% In-Service Guarantee in the unlikely event your analyzer does not meet Ortho's minimum performance standards.†
